Re: Request for Information for the San Mateo Creek Basin Legacy Uranium Site

Dear Ms. Gardner:

On June 14, 2011, General Electric (GE), on behalf of United Nuclear Corporation, received a 104(e) Information Request for the San Mateo Creek Basin Legacy Uranium Site from the U.S. Environmental Protection Agency (EPA). On June 24, 2011, EPA received your request for a six month extension to respond to the 104(e) Information Request. In your request, GE also offered an interim response after three months.

Based on the EPA's review of your request, we are extending the deadline for your response by 45 days. As a result, your response to the 104(e) Information Request is now due no later than August 29, 2011. If a second extension should be requested by GE, the EPA requests GE submit an interim response by August 29, 2011. Should you have any question, please contact Mr. Stephen Capuyan, Enforcement Officer, at (214) 665-2163 or capuyan.stephen@epa.gov. Thank you for your attention to this matter.

Sincerely,

Wren Stenger, Associate Director
Technical and Enforcement Branch
Superfund Division
